Art Unit: 2644

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 to 4 and 8 to 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Azima.

Azima discloses a panel loudspeaker which is comprised of at least one sound radiating panel (2) having a core layer (22) and at least one cover layer connected with the core layer (21), a periphery which is formed by a frame (1) that surrounds the at least one sound radiating panel with a later gap (between 20 and 20 of fig. 2a), and at least one connecting element that connects the at least one sound radiating panel with the periphery (20) wherein that at least one connecting element is under mechanical tension when connected with the periphery (col. 4, lines 24 to 36), and wherein regions of the at least one cover layer that are connected with the core layer are also

Art Unit: 2644

under mechanical tension (inherent that wherein joints 20 are under tension that cover layer 21 is also under tension).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Azima.

Regarding claim 6, the applicant has claimed that the sound radiating panel is a bass panel adapted to reproduce low-frequency sound. Even though Azima does not explicitly disclose reproducing low frequency sound, it would have been obvious to set the panel speaker to reproduce low frequency as claimed because it would have been a designer's choice to set a system to reproduce a certain range of frequency in an audio signals.

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The applicant has requested that the Supplemental Information Disclosure Statement (which was received on April 28, 3003) should not be open to the public. The applicant has to submit such request in a petition.
